

### STAINLESS STEEL, MAGNETIC DRIVE, CENTRIFUGAL PUMPS

- CAPACITY <450L/MIN
- HEAD <61.3 Metres
- 🞾 SEALLESS LEAK FREE DESIGN
- 🚧 STAINLESS STEEL BUILD
- 🞾 TOTAL CORROSION RESISTANCE
- UK ASSEMBLY

# COO PSO OVERVIEW

The PSO series of sealless magnetic drive pumps are an open impeller type, which is designed for chemical fluid transfer with sludge or slurries. The open impeller enables a lower NPSH feature.

High capacity stainless steel magnetic drive pumps, with flow rate up to 450 LPM.

Our PTCX Stainless Steel magnetic drive pumps are manufactured in 316L stainless steel as standard.

## CCO SEALLESS LEAK FREE DESIGN

A fully sealless structure design resolves leakage problems, and makes sealless magnetic drive the best choice for transferring hazardous or volatile chemicals

## **COO** QUICK INSTALLATION & EASY MAINTENANCE

The feature of simple structure requires no special tools to install or to disassemble. Having no mechanical seal saves time on installation and disassembly and will reduce the the frequency for parts replacement and maintenance.

CCCO CRESTPUMPS CHEMICAL PUMPING SOLUTIONS

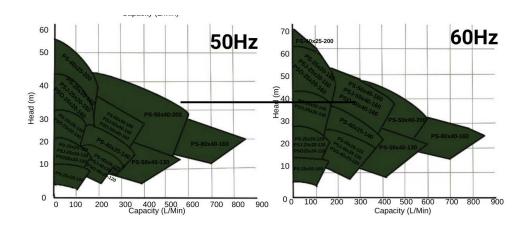

### STAINLESS STEEL, **MAGNETIC DRIVE**, CENTRIFUGAL PUMPS

# CCO RANGE CURVES

Performance curve family for the magnetic drive PSO Series.

## CCO INFORMATION

## CCO RANGE DIMENSIONS

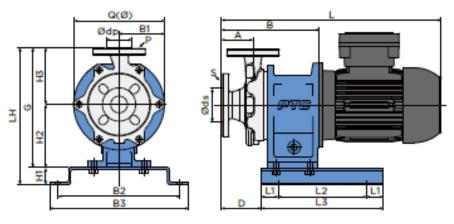

For specific 3D CAD drawings or specific pump dimensions, please contact us at info@crestpumps.co.uk or telephone +44 (0)1425 627700.

#### NOTE:

1. The total length and weight of the pump will differ depending on

- the brand of the motor.
- 2. All dimensions are in mm.
- 3. Assembly tolerances are +/- 3mm.

Model range is full polypropylene range. Please see our website for more details on cast iron models.

## CCC EXPLODED VIEW

### Modular Design Interchangeable Parts Reduce Cost

Front Casing Precision casting method is used to bring a universal flange design for three types of piping connections which are ANSI, JIS, and DIN. Casing Cover Special flow channel and easy disassembly design make easy maintenance.

Gasket PTFE Is used as gasket standard material which compatibility is used for most chemicals in the industry.

# \_\_\_\_\_\_

High precision forging unit is used to improve balance during operation. Shaft rearning design helps inner flow channel for better cooling and improve durability.

Anti-vortex design for rear

casing is to prevent abrasion

caused by impurity substances.

0

#### **Outer Magnet**

Outer magnet surface w anti-corrosion coating is avoid corrosion caused external environmental inf ences.

Main Material SUS316L Is provided for better corrosion resistance. Alloy20 and Hastelloy-C equivalent are also provided for optional selection.

- Impeller Precision casting method is used to bring one-plece design of structure without welding which improves durability and better corro-

sion resistance.

60

#### Bearing Thrust ring Sleeve

Parts are made with SIC material which provides low friction with minimum wear and excellent chemical corrosion resistance.

#### Inner Magnet

High-performance rear earth magnet is used to provide for the inner magnet, temperature use range from minus 80 degree to 280 degree Celsius.

## Rear Casing

One-plece design of rear casing is of excellent pressure and corrosion resistance. Coupling type material provide SUS316L, additionally an optional Hastelloy-C equivalent material to reduce the magnetic loss and improve the operation efficiency.

#### Baseplate Adapter

Two-plece design for baseplat adapter can be customized adjusted according to the in: tion height on site. The instal of motor is designed for **ster IEC motor frames** and closed pled design requires no special nor shaft alignment.
